Website overview:
This is a forum for sharing your experiences, where people can share their journeys, delicious foods and everything they want to share with others.

Functional Overview:
Every ordinary user will have their own account. After the account is successfully logged in, they can do the following things:
1. Publish your own experience, this can be a description of your own experience, or a good-looking photo taken
2. Edit previously published articles or images
3. Can follow the users you like
4. View articles published by other users
5. Like the article
6. Comment below the article
7. Search friends
8. Search articles for specific keywords, and articles for specific categories

Administrator users can control the behavior of ordinary users:
1. For example, when an account violation occurs, the Administrator can cancel the use of the account.
2. The administrator can restore the right to use the account

Novel idea, but I am not sure if it can be achieved:
1. The administrator can insert an ad in the page
